

The theft of vehicle registration number plates from cars and vans and their subsequent use on other vehicles in the commission of crimes, such as robbery and obtaining fuel for a car without payment is increasing. Thieves also steal number plates, then exceed the speed limit or park unlawfully and the real owner gets sent a fixed penalty ticket, causing distress and inconvenience.

Warwickshire Police are offering motorists a **free** set of tamper resistant number plate screws that they can use to replace their current set to make number plates more difficult to steal. Instructions are provided and no drilling is needed.

Please indicate below your vehicle type by ticking the appropriate box below. We will then post you a set of screws, instructions and some vehicle crime prevention advice.

	Car Type	Tick
1	Alfa Romeo, Audi, Ford, Volvo, Volkswagen	
2	Vauxhall	
3	Lexus, Toyota – [Avenis, Hilux, Prius, RAV 4, Verso]	
4	BMW, Citreon C6, Berlingo, Realy, Xsara Picasso, Dispatch
