

***Village needs investment to sustain current population:***

Roads too narrow and dangerous for children

Utilities, particularly water and sewerage

The shop does not meet needs

Speeding through village a big issue

Potholes a danger

Parking a major problem

Pavements uneven

***No more development***

Historically, developers have agreed to provide community benefits but do not deliver

If there is new development the infrastructure of Stockton needs to be significantly improved, particularly water/sewerage

School full - influx of new children will cause problems

Cannot support more traffic safely

Significant increase in population will put pressure on doctors, pharmacists, etc

Already sufficient housing stock - shared ownership homes available

***Improvement suggestions***

Attract local businesses - hairdressers, butchers, better shop

Provision of more parking areas

Larger school and better play areas for children

Revised bus service, including evenings, with a better turn round for buses

Introduce speed restrictions

Need affordable housing to allow grand children to stay in village and those with local connections to move here

Better street lighting

Dog exercise fields

***Objections to Richborough proposals***

A426 access too dangerous and access via Sycamore Close will put extra pressure on the village's already crowded roads with 160+ extra cars

Newcomers bringing anti-social behaviour

Most people who move into vacant houses do not have local connections
